

Project Title: Responsive Website with Login, Logout, and Contact Us Pages using Java

Description

This project is a responsive website with a theme of your choice that includes three pages, a login/logout flow connected to a database using Java, and a Contact Us page. The form submission data will be connected to the database using Java as well. The pages will be responsive to basic devices of Desktop and Mobile containing one model named user, one service named user service, and three servlets named login, logout, and register. Additionally, there will be one JDBC connection.

Installation

1. Clone this repository to your local machine.
2. Open the project in your preferred Java IDE.
3. Import the necessary libraries and dependencies (if any).
4. Set up a local database using MySQL or any other relational database management system.
5. Update the JDBC connection string with the appropriate credentials and database information.

Usage

1. Run the application in your preferred Java IDE.
2. Access the login page by navigating to the appropriate URL.
3. Enter your credentials to log in or register for a new account.
4. Access the Contact Us page to submit a form with your information.

Contributing

If you would like to contribute to this project, please fork the repository and submit a pull request.

Data base before new contact us:

Data base after new addition of contact us:

Login credentials(users):

The screenshot displays the MySQL Workbench interface. The 'Navigator' on the left shows the 'ashmita' database with tables 'contactus' and 'users'. The 'users' table is selected. The 'Result Grid' shows the following data:

emailAddress	password	firstName	lastName
abc@123.com	1234	ab	c
ashmita@abc.com	1234	Ashmita	Bhattacharyya

The 'Query' window shows the SQL statement: `SELECT * FROM ashmita.users;`

The 'Output' window shows the message: 'Query Completed'.

The 'Status Bar' at the bottom indicates the system temperature is 29°C and the date is 15-03-2023.
